

:APOGEE PORTAL

:Apogee WebApproval

The interactive portal for uploading and approving pages.

Who Needs it

:Apogee WebApproval is the ideal online soft proofing tool for:

- Printers: Commercial, Publication and Large Format:
 - PrePress Production Responsibles.
- Publishers: Magazine, Periodicals, ...
 - PrePress Creation Responsibles.
- Large Corporations: Brochures, Newsletters, ...
 - Branding responsibles.
 - Print buyers & Purchase departments.
 - Marketing Communication departments.
- Creative Agencies: Promotional Literature, Flyers, ...
 - Designers.
 - Print Production Specialists.

How it Works

:Apogee WebApproval expands your :Apogee Prepress server with a webportal for file-upload and approval.

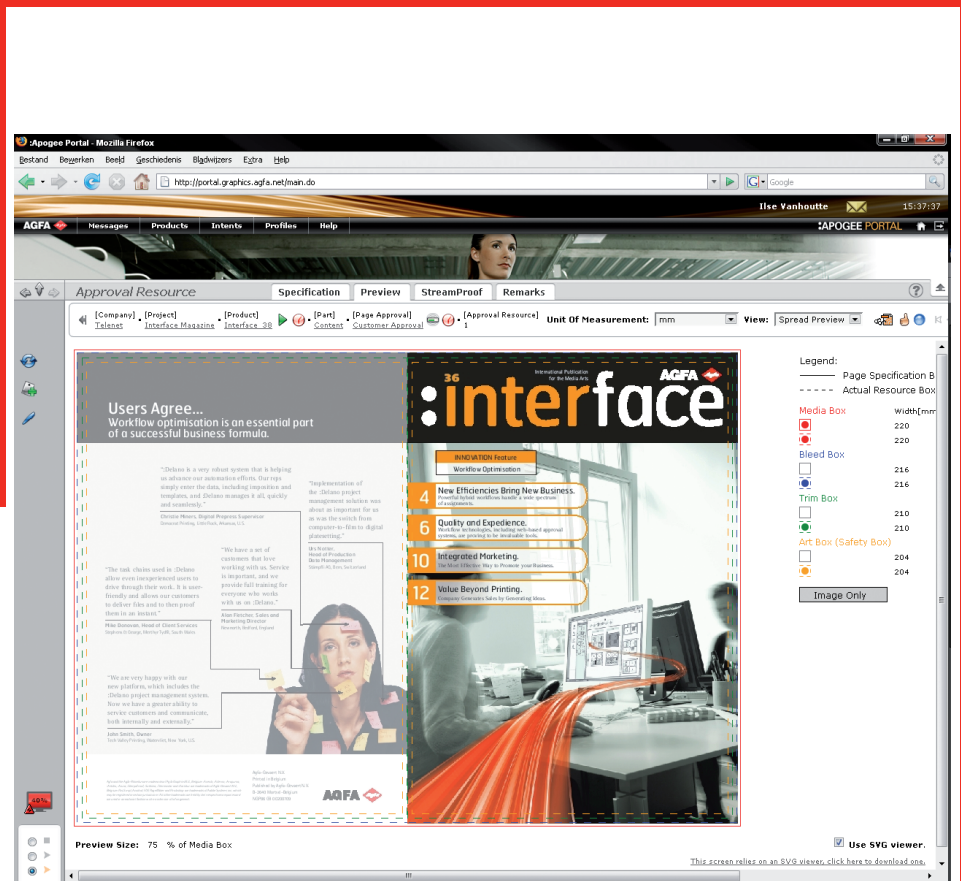

Steps:

- The prepress operator creates the job in the :Apogee Prepress client.
- The job is submitted via :Apogee WebApproval.
- Your customers are invited to upload their files in an organized way via WebApproval. Or they can upload files to a standard FTP from which they can be processed by :Apogee.
- Incoming files are automatically processed by :Apogee.
The results are fed back into :Apogee WebApproval.
- The customer is invited to review the results.
- Files are marked ready for production on the :Apogee Prepress server if approved.
- The prepress operator is informed if your customer rejects and/or adds remarks.

In short: it's the interactive portal for uploading and approving pages

Problems it Solves

- Organizational: Lets you retrieve files and proofs from your customers in an organized fashion.
- Delivery costs : Saves time and money by eliminating the delivery of cumbersome emails or hardcopy proofs.

Benefits of :Apogee WebApproval

Time:

- Shorten file reception and approval cycles to better meet project deadlines.
- Save time and eliminate frustration by not having to chase your clients for feedback & approval.

Quality:

- Give your customers a value-added dashboard for file upload and approval with :Apogee's easy-to-use Interface.
- Create satisfied, loyal customers by giving them 24/7 access to your prepress department.

Costs:

- :ColorTune integration
- Cut delivery and printing costs by using soft proofs
- Reduce unnecessary, un-billable reworks by detecting errors early in the process.
